LEAVE YOUR LEAVES TO HELP THE ENVIRONMENT

Reading time: <00:45>

Most people don't realize that one of our typical fall activities hurts the environment. Removing leaves from our yards can lead to a loss in biodiversity for local ecosystems.

Leaving your leaves on the ground has positive impacts, such as preventing flooding, creating healthier soil, and providing a habitat for beneficial pollinators in our yards.

This fall, join us in leaving our leaves to promote healthy ecosystems in our local community. Make the pledge to leave your leaves and learn more at leave-your-leaves-dot-org.
